

Final Project Rubric (STAT 425, Sections 1 & 2, Spring 2025)

- **Title Page (5 points)**
 - Title Clarity: 2 points (Title should be concise, descriptive, accurately reflects report content)
 - Group Member Information: 3 points (Listed member names, clearly describe contributions)
- **Abstract (15 points)**
 - Clarity and Relevance: 10 points (Clearly summarizes key points, covers major report sections like problem statement, methods used, findings, and conclusions)
 - Length: 5 points (Concise, typically within 150-250 words)
- **Exploratory Data Analysis (EDA) (15 point)**
 - Data Understanding: 6 points (Clear understanding of the variables under consideration, relevant statistics, numerical summaries and visualizations included to describe the data.)
 - Data Insightfulness: 6 points (Discussion of trends, patterns, anomalies)
 - R Codes: 3 points (Submitted R codes run smoothly, with clear labels and comments.)
- **Model Building (50 points)**
 - Model Fitting: 15 points (Model selection and model fitting methods should be correct and include details)
 - Diagnostics and Remedials: 15 points (Assumptions checked, remedials taken if needed)
 - Model Comparison and Selection: 15 points (Select two or more models to compare. Give detailed information to justify final selection)
 - R Codes: 5 points (Submitted R markdown run smoothly, with clear comments in code chunks if needed.)
- **Discussion of Results and Conclusions (15 points)**
 - Findings Summary: 10 points (Present findings concisely using bullet points)
 - Reflect on Challenges and Open Questions: 5 points (Discussion of encountered challenges, proposed next steps)
